Informatics graduate from Universitas Multimedia Nusantara with hands-on experience through a professional internship as a Full-Stack Developer at Alfamart. Focused on Full-Stack Development, with working experience in Mobile Development. Proficient in React, JavaScript, Python, Flask, FastAPI, PostgreSQL, and Oracle SQL, demonstrated through building and automating end-to-end internal reporting and approval systems applying manual and automation testing throughout development. Experienced in building web applications, backend services, and automation tools for internal business systems.

EDUCATIONAL BACKGROUND

Universitas Multimedia Nusantara – **Tangerang, Gading Serpong** August 2022 – August 2026

- Bachelor of Informatics (GPA: 3.61/4.00)
- Relevant Courses : *Website Programming, Human and Computer Interactions, Mobile Application Programming, Mobile Cross-Platform Programming, Machine Learning, Expert System, Numerical Analysis, Information System Project Management, Software Engineering & Project Management.*

WORK EXPERIENCE

PT Sumber Alfaria Trijaya, Tbk – **Tangerang, Alam Sutera** July 2025 – January 2026

Full-Stack Developer Intern

Supported Alfamart's Finance Consolidation division processes by developing internal reporting systems, automating financial data processing, and resolving technical issues to improve reporting accuracy and operational efficiency.

- **Dashboard Outstanding Finance – Web-Based Reporting System**
  Python, Flask, Oracle SQL, HTML, CSS, JavaScript
  - Developed a web-based dashboard to support finance consolidation and monitoring of outstanding transactions.
  - Automated 17 financial reports using Python scripts, significantly reducing manual spreadsheet processing.
  - Implemented backend logic with Flask and optimized complex Oracle SQL queries for accurate, efficient data retrieval, with interactive front-end components using HTML, CSS, and JavaScript to visualize summary and detailed financial data.
- **Cash Deposit Machine (CDM) Form – Internal Full-Stack System**
  React.js (Vite), FastAPI, PostgreSQL
  - Developed an internal Cash Deposit Machine (CDM) submission and approval system to digitize and streamline cash deposit reporting, with a responsive front-end using React.js (Vite) focused on performance and usability.
  - Designed and implemented RESTful APIs using FastAPI with PostgreSQL for data processing, validation, and business logic, including Role-Based Access Control (RBAC) for secure, multi-level approval workflows.
- **Alfa One LPT Module – UI/UX Mockup Design**
  Figma
  - Designed UI/UX mockups and user flows for the LPT module in the internal Alfa One mobile app, converting Excel-based financial data into tabular, mobile-friendly layouts aligned with business requirements from finance stakeholders.
  - Created wireframes, user flows, and high-fidelity prototypes using Figma, collaborating with finance managers to ensure interface consistency and usability.

ORGANIZATIONAL EXPERIENCE

VIT- C Manifest UMN 2022 – **Tangerang, Gading Serpong** September 2022 – December 2022

Security Division Coordinator

- Led a 30-person security team for a large-scale event with 2,800+ participants, ensuring on-time event execution and orderly participant flow through structured crowd control and discipline enforcement.

Mentoring UMN 2023 – **Tangerang, Gading Serpong** December 2022 – December 2023

Security Division Coordinator

- Oversaw security operations for a mentoring program involving 2,800 new students, leading a 30-person team to maintain on-schedule activities and structured mentee movement while reinforcing participant discipline, achieving 90% satisfaction.

Starlight UMN 2024 – **Tangerang, Gading Serpong** January 2024 – December 2024

Security Division Coordinator

- Coordinated a 24-person team managing logistics, event regulations, and access control for the Starlight event, ensuring an incident-free, on-time event with orderly guest star movement and secure prohibited-item screening.

KEY PROJECTS

- **Vego Application – Backend Developer**

Built backend functionality for a 16-page React Native food delivery app based on a Figma prototype, using Supabase for authentication, database, geotagging, and image storage to support features including food ordering, customer reviews, food photos, and restaurant location search, with frontend implementation support in JavaScript.

- **U-Journal Application – Full-Stack Developer**

Built a Kotlin-based journal app using Jetpack Compose with responsive UI and note features supporting photo attachment and geolocation, integrated with Firebase for secure backend storage.

- **Cloning UI of Ayo Indonesia Application – UI/UX Designer**

Recreated the AYO Indonesia mobile app interface using React Native, JavaScript, and TypeScript, replicating the original UI/UX and implementing fully functional navigation.

- **BazaarSpot Mobile App Design – UI/UX Designer**

Designed concepts, personas, and UI/UX for the BazaarSpot mobile bazaar app using Figma, and implemented key front-end features based on the design.

- **Santo Barnabas Catholic Church Website – Frontend Developer**

Built a responsive 18-page church website with HTML, Tailwind CSS, JavaScript, and Laravel, featuring weekly-updated activity announcements, parish bulletin (Warta Paroki), social media links, and online registration for events such as baptism and marriage, deployed and tested across devices to ensure consistent performance.

CERTIFICATIONS

- **Introduction to Python & Python Intermediate** - Completed both basic and intermediate Python courses on SoloLearn, mastering concepts from basic syntax to functional programming through practical exercises and small projects.
- **HCIA-AI V3.5 — Huawei Talent Online** - Studied AI history, Huawei Ascend system, ML/DL algorithms, and MindSpore framework as part of the HCIA-AI V3.5 program.
- **Microsoft Excel Specialist Batch 2** - Earned the 'Microsoft Excel Specialist' certification through a collaboration program between DQLab, UMN, and XERATIC, demonstrating proficiency in formulas, data analysis, and Excel optimization features.

TECHNICAL SKILLS.

- **Languages:** Bahasa Indonesia (Native), English (Fluent, TOEIC: 885/990)
- **Programming Languages**: Python, Java, JavaScript, TypeScript, Kotlin, C, C#,
- **Web & Mobile Development**: React Native, HTML, CSS, Tailwind CSS, Laravel, Android Studio, Jetpack Compose
- **Backend & Databases**: MySQL, Firebase, Supabase, FastAPI, PostgreSQL
- **Python Skills:** Data processing, scripting, visualization, clustering, optimization
- **Development Tools & IDEs**: Visual Studio Code, Jupyter Notebook, RStudio, Anaconda, Eclipse
- **Tools & Platforms**: phpMyAdmin, GitHub, Microsoft Office, Figma, Canva
- **Project Management Tools**: Notion, Jira, ClickUp
- **Additional Skills**: Requirement gathering, stakeholder communication, timeline & logistics planning, documentation
